

FALCOWEB

Control Your **Access Control** from the **World Wide Web**

FalcoWeb at your fingertips to deliver extensive access control capabilities anytime, from anywhere you have internet access. Any existing PC with a web browser and an Internet connection can be used to take advantage of FalcoWeb' complete suite of access control functions - anytime, from any place on the globe.

FalcoWeb system is composed of the access control hardware, the access control application, and an Internet browser. The intelligent controller hardware with the software application over TCP/IP through internet/intranet, or wireless connection. By unitizing true distributed processing the intelligent controller can determine who can and who cannot access a door.

It also extremely flexible. It is a myriad of useful reports can be filtered in ways suitable to each customer's needs. FalcoWeb's design allows for easy integration to over 30 brands of IP camera and any company HR database or one card systems.
